Cal OES COASTAL REGION

Roadway Damage due to Winter Storms, Humboldt County

On 12/19/16 at 1712 hours the California State Warning Center (CSWC) received a Proclamation from Humboldt County declaring a local emergency due to damage to roadways caused by recent storms and flooding. There are approximately 6 roads in the area that have either sustained damage or are in danger of sustaining damage due to landslides caused by recent winter storms to include California Disaster Assistance Act (CDAA).

- Humboldt County has requested all available recovery assistance from the State and Federal Government.
- The Cal OES Fire Duty Officer (FDO) and Cal OES Coastal Region Duty Officer (CDO) are in contact with Humboldt County and providing updates as they become available.
- On 12/21/16, Board of Supervisors (BOS) Minute Orders and a CDAA Request Letter was received for the Proclamation from Humboldt County for storm damages.

Cal OES INLAND REGION

Train Derailment, Roseville, Placer County, Spill 16-7817

On 12/26/16 at 1254 hours the California State Warning Center (CSWC) received a report from Union Pacific Railroad (UPRR) advising a single locomotive, Locomotive #UP1642, derailed upright when it ran through a split switch. .

- No hazardous materials were released.
- The mainline was unaffected and no injuries occurred.
- The CSWC made all notifications per SOP.

SITUATION SUMMARY

Cal OES SOUTHERN REGION

Natural Gas Release, Porter Ranch, Los Angeles County, SPILL: 16-7798

On 12/24/16 at 1413 hours, the California State Warning Center (CSWC) received a report from Southern California Gas Company (SoCalGas) advising of an unknown amount of natural gas vapor releasing from the Aliso Canyon Storage Facility, wellhead #SS25. The release was discovered on 12/24/16 at approximately 0745 hours as part of daily patrols and inspections a very slight and intermittent observation of methane was detected utilizing infrared camera technology (FLIR) at the #SS25 wellhead at the Aliso Canyon Storage Facility.

- On 12/26/16, the CSWC received an update from SoCalGas. They continue to monitor conditions at the site. Slight off-gassing continues, with no change in conditions and no other anomalies identified. There are no detectable odors and there is no indication of a present or potential hazard to human health, safety or the environment.
- SoCalGas believes this is a continuation of off-gassing from the soil that has previously been observed at other locations at the site. This recent off-gassing of the soil coincides with the recent intense rain events at the site and is not believed to pose a present or potential hazard to human health, safety, or the environment.

WEATHER OF CONCERN

Weather of Concern

- A High Wind Warning is in effect from 0100 hours 12/27/16 until 0400 hours 12/28/16 for portions of Modoc County.
- Drier air will filter across the entire area today and tonight which could set the state for at least a few hours of freezing to sub-freezing temperatures across inland valleys late tonight into Tuesday morning. Near the bays, low temperature will mostly be in the mid 30s to lower 40s.
- **Active Weather Warnings, Watches and Advisories by County:**
http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

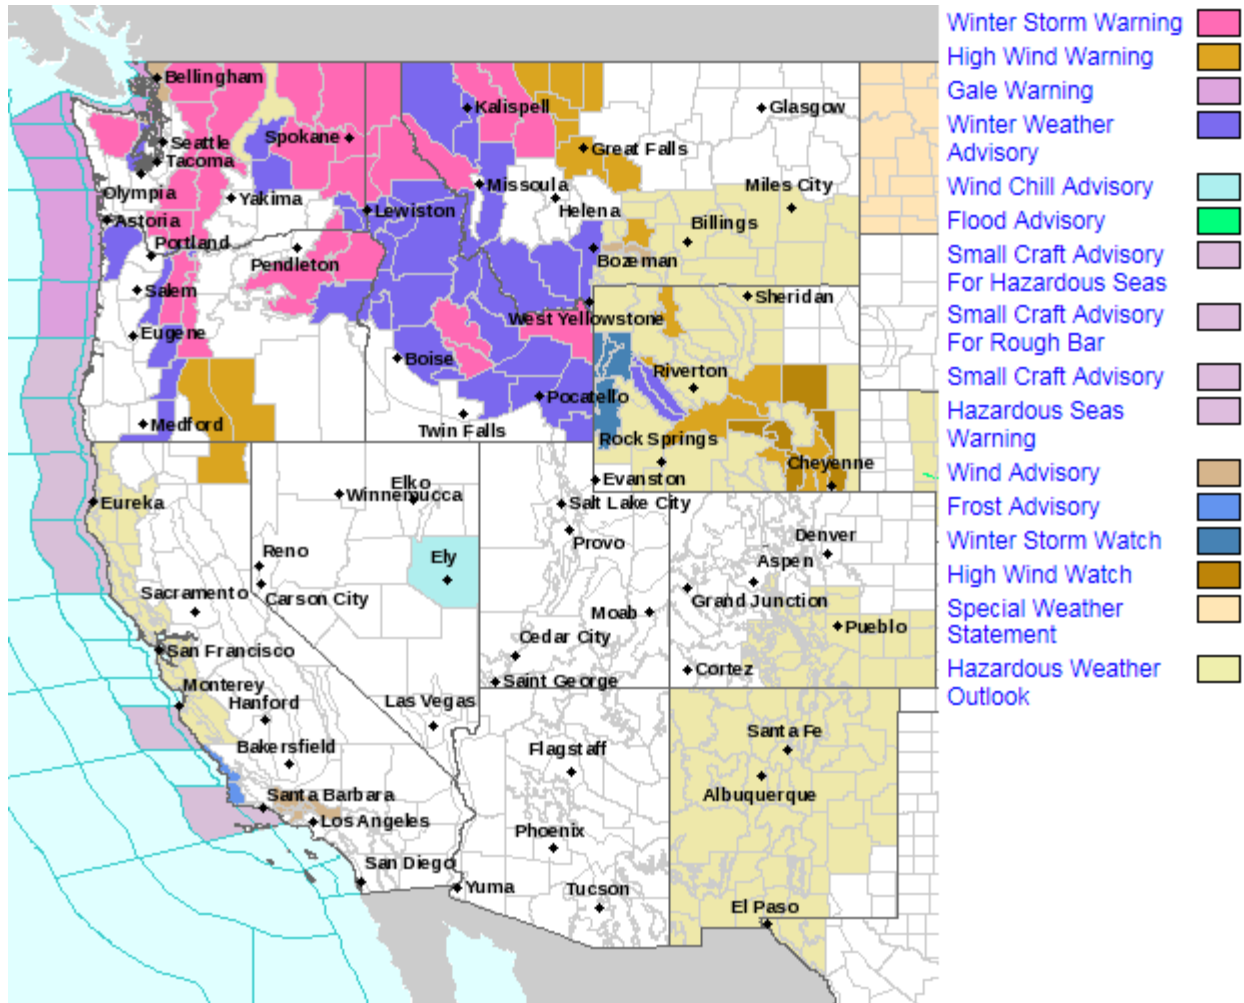

NORTHERN CALIFORNIA

Clear skies across interior Northern California as the offshore low continues dropping south off the Southern California coast. Temperatures remain quite cold with current readings ranging from below zero in the colder mountain valleys to the mid 20s to mid 30s in the Central Valley and surrounding foothills. Cool and dry weather will be prevalent this week, though a weak system passing to the north may bring a few light showers to the northern mountains on Tuesday. Overnight lows are expected to be a little milder tonight as some cloudiness increases ahead of Tuesday's system, though minimums will once again dip down into the upper 20s across portions of the Central Valley. Milder temperatures are expected by mid-week.

SOUTHERN CALIFORNIA

An upper low that just skirted to the west the Central Coast is now about 300 miles to the southwest of Point Conception. This upper low will continue to the south for another couple hundred miles before it parks itself and spins. This will not be the last we hear of this low, it will make an appearance in extended period. The altostratus clouds streaming out from this low are creating partly cloudy skies although mostly sunny skies are possible by this afternoon. The surface reflection of the upper low will be enough to create offshore flow and there will be some sub advisory gusts below the passes and canyons. There will be a few degrees of warming across the coasts and valleys today with the offshore flow but max temperatures will still be below normal.
